EDUCATION

Louisiana State University (LSU), Baton Rouge, LA **Expected Graduation: May 2027**
Bachelor of Science in Computer Science (Software Engineering) GPA: 4.209
Minors in Digital Media Arts & Engineering in Technology (DMAET) and Honors Research
Honors: TOPS Honors Award; Chevron Energy Leaders Scholarship in Engineering (x4); President's Honor Roll (x5); Dean's List; S&B Engineers Brookshire Scholarship (x3)

Cornell University, Remote **May 2024 – August 2024**
Machine Learning Foundations e-Certificate, Break Through Tech

PROFESSIONAL EXPERIENCE

Undergraduate Research Assistant | *AISx Lab, Baton Rouge, LA* **May 2026 – Present**

- Contributes to the development of a 3D computer vision benchmark for structural analysis as part of a National Park Service-funded research project.
- Processes and annotates complex 3D point cloud data, ensuring data quality and consistency for downstream computer vision research and model development.
- Collaborates with AISx Lab researchers to prepare large-scale 3D datasets for machine learning and computer vision applications in historic preservation.

Machine Learning/AI Research Assistant | *SDMI, Baton Rouge, LA* **August 2025 – Present**

- Develops AI/ML and LLM-based pipelines for disaster-response applications, including automated extraction and validation of emergency resource requests.
- Processes and engineers geospatial and environmental datasets for predictive modeling, incorporating satellite-derived features and automated data-quality checks.

Machine Learning/AI Fellow & Ambassador | *Break Through Tech AI, Remote* **May 2024 – Present**

- Selected from **3000+ applicants** for a summer ML Engineering program, completing a Python-based curriculum.
- Collaborated on a machine learning project with Abt Global and participated in a WiDS Kaggle competition.
- Promoted the AI program on LinkedIn as an ambassador as of September 2024, reaching **hundreds of applicants**.

Software Engineering Intern | *Chevron, Houston, TX* **May 2025 – August 2025**

- Developed a Microsoft Teams chatbot using Python and Azure Bot Framework to streamline workflows for the DealAId team, incorporating agentic AI, interactive UI elements, and secure file upload capabilities.
- Served as a housing liaison for **30+ Chevron interns**, hosting events and promoting safety and communication.

TECHNICAL SKILLS

- **Languages:** Python, Java, C, R, Kotlin, HTML/CSS
- **Libraries/ML:** TensorFlow, scikit-learn, pandas, NumPy, Seaborn
- **Data/Computer Vision:** LiDAR, 3D point clouds, GeoJSON, data preprocessing, feature engineering
- **Tools/Platforms:** Git, GitHub, Google Earth Engine, Azure Bot Framework, CloudCompare, Android Studio

ACTIVITIES

- Society of Peer Mentors
- Women in Computer Science
- Tau Beta Pi
- Society of Women Engineers
- Reboot Scholars
- Google Developer Student Clubs
